

## **Document Automation**

PDF forms— the missing link

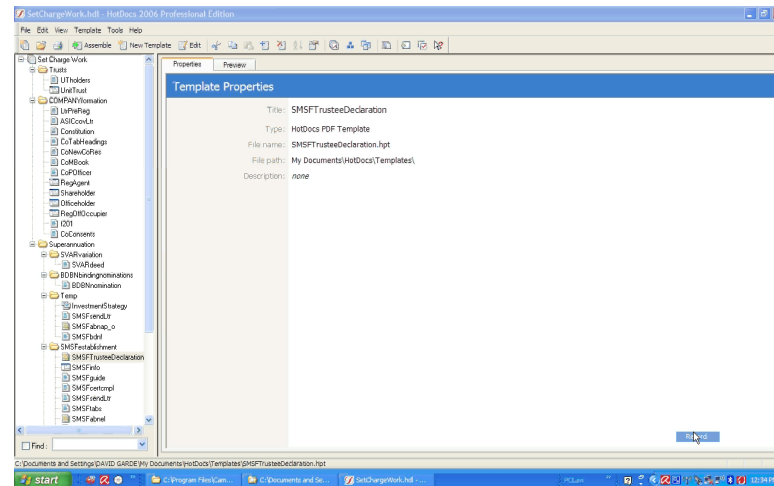

# Automating a PDF

- Make the PDF into a PDF precedent

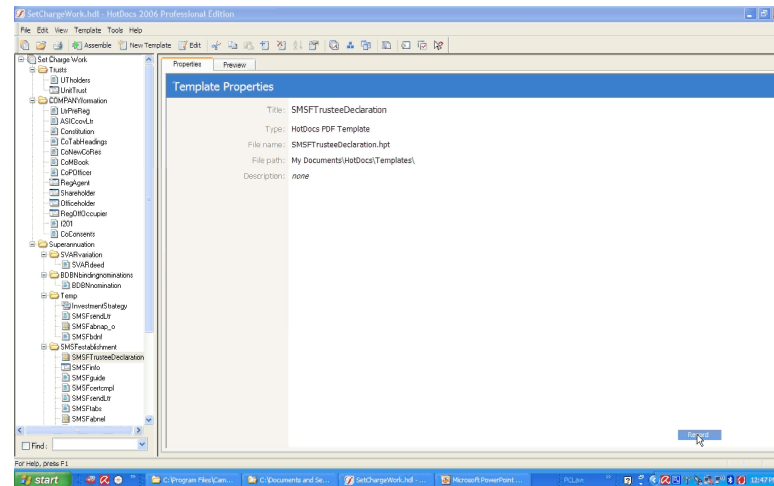

- Set up the PDF precedent to take the variable client information from an existing variable set

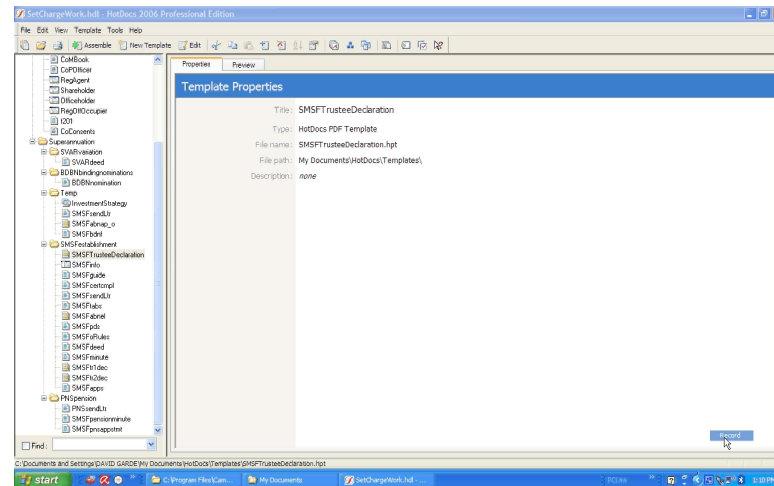

# Automating a PDF

- Place the variables from the variable set to the right places on the PDF precedent

# Automating a PDF

- Assemble the PDF precedent into a result including the client information

# Automating a PDF

- The result is a PDF too
