**Saturday 29 March 2008**

# Rationale

- Most disputes are resolved without the need for judicial decision making
- We have developed software tools to support **Alternative Dispute Resolution (ADR)**.
- These tools provide support for **interest-based bargaining** and **Bargaining in the Shadow of the Law**.
- .Our current applications are in Australian Family Law

# The ABC New Inventors Show

- The Family\_Winner software was evaluated on the Australian Broadcasting Commission's **New Inventors Program** in 2005
- The show has four research assistants.
- *I believe the television program provides an excellent introduction to the software.*
- *It answers many of the questions posed about the software.*
